SUMMARY

Product Engineer and Full Stack Developer with 5+ years building web applications in production: a multi-company ERP used as an accounting system, e-commerce with point of sale and an online raffle platform with payments. I work alongside business teams to turn their needs into product, end to end: from PostgreSQL data modeling to the interface, with testing, CI/CD and security, and my design background keeps user experience a priority.

EXPERIENCE

Tech Lead & Full Stack Developer | GRUPO VA | Caracas, Venezuela 06/2026 – 11/2026

- Led a team of 6 and the development of a multi-company ERP in production as the group's internal accounting system: 22 modules (accounting, invoicing, treasury, inventory, sales, payroll and more), 140+ PostgreSQL tables with Row-Level Security, an audit log, 225 test files and GitHub Actions CI.
- Delivered 4 production websites on custom domains (Sal Celestial, Allaven, Bespoken, Parmigiana) and 2 online stores with point of sale for basketball clubs.
- Built admin panels for non-technical teams (a visual block editor with drafts and version history, resumable email campaigns) and 8 touchscreen brand activation mini-games with React, PixiJS and Capacitor for Android and Android TV.
- Defined standards for 7 projects: separate environments, E2E testing with Playwright, WCAG 2 AA accessibility, security headers (CSP, HSTS) and technical SEO.

Founder & Lead Full Stack Developer | Osiiris | Remote 01/2026 – 06/2026

- Built osiiris.com, e-commerce with an admin panel and point of sale (POS) with cash-register shifts (Next.js, TypeScript, PostgreSQL).
- Implemented race-condition-free stock deduction with PostgreSQL row locks, PayPal payments, NextAuth and automatic PDF invoices.

Co-Founder & Full Stack Developer | Luckyly | Remote 01/2021 – 03/2026

- Co-founded a software and digital design agency building custom web solutions.
- Built luckyly.win with a small team: an online raffle platform with an interactive roulette, payment verification, two-factor authentication and a role-based admin panel (Next.js, TypeScript, PostgreSQL).

Graphic Designer & Video Editor (Freelance) | Remote, Latin America 2015 – 2021
Brand identities, digital marketing pieces, video editing and camera operation for clients across Latin America.
